Why Is This A Bad Design

1. Uses too many bright and clashing colors which makes the screen look noisy.
2. No clear visual hierarchy, so the user doesn’t know what to focus on first.
3. Poor alignment and spacing make the layout feel messy and unorganized.
4. Too many labels, banners, and decorations create confusion instead of clarity.
5. Icons are shown without enough context, making interaction unclear.

Why This Is A Good Design – Good Design

1. Clean and minimal layout makes the interface easy to understand.
2. Clear visual hierarchy guides the user naturally through the screen.
3. Consistent colors and fonts give a professional and polished look.
4. Real images and useful information help users make quick decisions.
5. User-friendly elements like search, ratings, and time improve usability.
